Profile

My name is Ashi and I'm a Full Stack Web Developer. I write code with various technologies (MongoDB, NESTJS, Express, Typescript and React). I take every opportunity to expand my knowledge and become more professional as time progresses.

Employment History

Fullstack Developer, CodeOasis

AUGUST 2022 — PRESENT

In Code Oasis I was involved in multiple ongoing production level applications at the same time. I was able to comprehend the code quickly and effectively and contribute major improvements.

- **Zap Group Ltd**

  JANUARY 2023 — PRESENT

  In zap, I built an ecommerce store using React (Next.js), Nest.js server, and styled components. I integrated multiple external stores into the ecommerce platform, enabling customers to make a single purchase through Zap Shop. Additionally, I implemented SAP for streamlined operations.

- **Top Card & ORT**

  AUGUST 2022 — JANUARY 2023

  I developed a unified platform for public transportation in collaboration with the Department of Transportation for **Moovit & Pango**. My responsibilities included implementing real-time transit information and fare payment systems, while ensuring regulatory compliance and a positive user experience.

Fullstack Developer, M.S.Bit Ltd

JANUARY 2022 — AUGUST 2022

In M.S.Bit, I develop numerous projects for companies in various technologies, among them React.js, NEST, NodeJS, MSSQL and MongoDB. In M.S.Bit, I used a variety of external API's from custom navigation using google maps, to banking using TINK, and many more.

Fullstack Developer (Freelance)

AUGUST 2021 — JANUARY 2022

Developing a website according to customer order:

- Implementation of a React frontend and a NodeJS backend
- Utilization and maintenance of a Mongo-Db
- Design and implementation of a non-relational database ERD
- Design user experience based on core UI/UX principles using Figma.
- Set timelines for the project using Jira or Monday

Quality Assurance, Air Force IDF

JANUARY 2018 — JANUARY 2020

Inspected applications at different phases in their development to ensure they met a set of consistent standards. This position required:

- Attention to detail
- Time management
- Written and verbal communication
- Knowledge of quality standards
- View things from a different angle

Education

Software Technitian, Ort Singalovsky

SEPTEMBER 2020 — SEPTEMBER 2021

Completed with excellence an extensive one year hands on course for developers in which we learned Full Stack fundamentals:

- OOP principles (Java)
- Web in React.js bootstrap, SASS, CSS, PHP
- Backend in NodeJS, Express and MongoDB
- Coding challenges in C
- Debugging using DevTools and working with Git
